SECOND ANNUAL

ONCOLOGY SYMPOSIUM

Empowering Professionals
and Advancing Evidence-Based
Strategies in Cancer Care

Saturday, April 6, 2019
7 a.m. – 3:30 p.m.

HOLLYWOOD, FL

COURSE OBJECTIVES

The purpose of this symposium is to address the clinical challenges faced by oncology professionals in all practice settings regarding advances in hematologic malignancies and breast cancer. Discussions will include how cancer molecular genetics is changing treatment outcomes, how integrative medicine can positively impact a patient's cancer experience, and an overview of the best clinical practices for managing immune related adverse events. The symposium will also include a review of how to recognize and treat fear and anxiety in persons with cancer.

- Discuss how the integration of relevant clinical trial data into clinical practice has the potential to enhance outcomes in patients with hematologic malignancies
- Assess how molecular and genetic abnormalities can be utilized in diagnosis, prognosis, risk stratification and therapy selection for patients with hematologic malignancies and breast cancers
- Outline the benefits of integrative cancer care including how the use of dietary supplements and medical marijuana may be beneficial to integrate into conventional cancer care
- Review the current surgical, medical oncology and radiation therapy treatment options for newly diagnosed breast cancer patients
- Provide an evidence-based overview, with implications for practice, of checkpoint inhibitors, monoclonal antibodies, oncolytics, viral therapies, and chimeric antigen T cell therapies.
- Understand more about risk factors for anxiety and depression in cancer and how to implement best practices in distress management
